RISK FACTORS

An investment in the Bonds issued by the Issuer involves a high degree of financial risk. You should carefully consider all information in this Prospectus, including the risks described below, and make an independent evaluation before you decide to invest in the Bonds.

This section describes risk factors deemed to be of importance for the Issuer and its direct and indirect subsidiaries. If any of the risks described in this section occur, the business, financial condition and results of operations of the Group could be materially and adversely affected, which could have a material adverse effect on the Issuer's ability to meet its obligations under the Bonds, including payment of interest and repayment of principal, and investors could lose all or part of their investment. Furthermore, in the event that several risks occur at the same time, this may lead to material consequences, irrespective of the impact of each such risk taken in isolation. In addition, this section describes risk factors relating to the Bonds as financial instruments.

The risk factors presented in this section are those which the Issuer is aware of and which the Issuer deems material for taking an informed decision whether to invest in the Bonds. The risks presented herein are not exhaustive. Other risks not currently known to, or not currently considered to be material by, the Issuer may also affect the Group's business, financial condition and results of operations, and consequently the Issuer's ability to meet its obligations under the Bonds. The risk factors are presented in categories where the most material risk, in the assessment of the Issuer based on the probability of its occurrence and the expected magnitude of its negative impact, is presented first under each category. Subsequent risk factors in the same category are not ranked in any particular order.

Unless otherwise defined, capitalised terms used in this section have the meaning given to them in the Terms and Conditions.

Risks relating to the Issuer and the Group

Risks relating to the Group's expansion and organisation

Risks relating to the Group's growth strategy and acquisitions

Acquisitions are a key element of the Group's buy-and-build growth strategy. Since the Group was founded in 2021, the Group has completed a large number of acquisitions and expanded its geographical footprint from Sweden into other Nordic countries, including Denmark, Finland and Norway. In April 2026, the Group further expanded into the Netherlands.

If the Group fails to identify and secure suitable acquisition targets, this may impede the Group's ability to grow at the intended pace, potentially limiting market expansion, revenue growth and competitive positioning. Furthermore, there is a risk that the Group will not be able to acquire new companies at favourable commercial conditions or at all due to, among others, prolonged or difficult negotiations, competing bids, cancelled sales processes, failure to obtain required competition clearance or other regulatory approvals and/or lack of funding.

Following completion of an acquisition, the Group may experience issues relating to integration of the acquired company, including (but not limited to) in respect of financial reporting, which may require time and attention from the Group's management and/or give rise to additional costs. Acquisitions may also expose the Group to unknown liabilities. Before making an investment in a company or business, the Group assesses the value and potential return on the investment. In making such assessment and otherwise conducting due diligence, the Group relies on both internal resources and investigations by third parties. There is a risk that due diligence examinations carried out by the Group or third parties are insufficient and/or otherwise fail to reveal all of the risks, or the full extent of the risks, associated with an acquired company or business. Post-acquisition, the Group may discover risks or other issues which were not disclosed or known to the Group at the time of acquisition. To the extent that the Group has obtained warranties and indemnities from the sellers in respect of an acquired company and/or taken out insurance, such warranties and indemnities and/or insurance (if any) may be subject to limitations, including, among others, limitations in respect of covered matters, deductibles, maximum amount and/or time limitations. As a result, the Group may incur losses that may not be recoverable from the sellers or the insurer, in part or at all. This could have a material adverse effect on the Group's business, financial condition and results of operations and may negatively impact on the Issuer's ability to satisfy its obligations under the Bonds.

In addition, in some cases the Group's acquisition agreements include earn out provisions with further consideration being payable by the Group upon certain performance targets being met. Future payment under such earn out provisions may put pressure on the Group's liquidity at the time such payments are required to be made, which could have a negative impact on the Issuer's financial resources and liquidity.

Risks relating to governance and internal controls

The Group comprises several entrepreneurially driven companies. The Group applies an entrepreneurial operating model which, within certain limitations, grants considerable autonomy to the Issuer's subsidiaries. At the same time, this structure places a significant degree of responsibility on the subsidiaries and a need for the Issuer to adequately control and monitor the activities and development of the subsidiaries. If the corporate governance and internal control procedures of the Group are not implemented or applied properly, there is a risk that failures arise and are not detected, which may result in unexpected financial losses as well as damage to the Group's reputation. In particular, if financial reporting guidelines issued by the Issuer to its subsidiaries are not complied with and/or financial information is not communicated properly and timely by the subsidiaries to the Issuer, the Group may suffer significant financial losses. This could have a material adverse effect on the Group's business, financial condition and results of operations and may negatively impact on the Issuer's ability to satisfy its obligations under the Bonds.

Risks relating to the Group's business activities and industry

Risks relating to attraction and retention of qualified personnel

The Group's ability to execute assignments and projects and obtain new contracts depends on its ability to attract and retain key personnel, including senior managers, highly skilled employees, project managers and other professionals. There is significant competition for personnel who possesses the skills needed to perform the services that the Group offers. In a competitive environment, there

is a risk of losing personnel to competitors who may pay higher salaries and/or offer more competitive benefits. If key personnel decides to leave the Group, this may result in a loss of knowhow and the Group may not be able to recruit personnel with comparable qualifications and expertise in a timely manner. It is also essential that the Group is able to recruit qualified personnel on a regular basis, including to support the continued expansion of the Group's business. If the Group fails to attract and retain key personnel, the Group may be unable to win new assignments and projects and/or deliver its services up to the quality standards that are expected by customers. In addition, the Group could be forced to use more sub-consultants, which in turn could have a negative impact on profit margins. Any failure by the Group to successfully attract and retain qualified personnel could have a material adverse effect on the Group's business, financial condition and results of operations and may negatively impact on the Issuer's ability to satisfy its obligations under the Bonds.

Risks relating to utilisation of personnel

The Group's business is dependent on its human capital and the Group must adequately use its workforce in order to achieve profitability. The rate at which the Group utilises its workforce is affected by a number of factors, including the Group's ability (i) to transfer employees between assignments and projects, (ii) to forecast demand for its services and thereby maintain an appropriate headcount, (iii) to manage attrition, (iv) to match the skills of its employees to the needs of the marketplace and (v) to secure a sufficient number of assignments and projects to maintain employee engagement. If the Group over-utilises its workforce to the extent that employees become exhausted or disengaged, it may lead to an increase in the rate of employee attrition. On the other hand, if the Group under-utilises its workforce, profit and profit margins may be adversely affected. This may occur, for example, where assignments or projects are delayed for whatever reason to the extent that the Group may not be able to utilise employees dedicated to that assignment or project for other assignments or projects in the interim. If the Group experiences significant levels of employee attrition or inadequately utilises employee capacity, it could have a material adverse effect on the Group's business, financial condition and results of operations and may negatively impact on the Issuer's ability to satisfy its obligations under the Bonds.

Risks relating to pricing of the Group's services

The Group principally enters into contracts with pricing terms based on agreed hourly rates, which reflect the Group's expectations regarding, among others, the expertise required for performance of the relevant assignment or project. If, for whatever reason, the execution of the assignment or contract requires the Group to employ personnel with higher levels of expertise than envisaged and/or engage sub-consultants at a higher cost, this may result in additional costs and loss of profit. Furthermore, a smaller part of the Group's revenue derives from fixed-price contracts. If completion of an assignment or project subject to a fixed price becomes more extensive than envisaged, the Group may incur losses. If any of these factors were to materialise, this could have a material adverse effect on the Group's business, financial condition and results of operations and may negatively impact on the Issuer's ability to satisfy its obligations under the Bonds.

Risks relating to insurance in respect of customer claims and liabilities

As a professional service provider in the consulting sector, the Group may become liable for customer claims that arise from the provision of its services. There is a risk that the Group's liability

insurances may not cover, in part or at all, any claims brought against the Group by its customers or other third parties in the course of the Group providing its services. The Group's insurance policies have various exclusions, and the Group may be subject to liability claims for which the Group has no coverage. Furthermore, the Group may incur costs and management resources in dealing with potential liability claims, including (but not limited to) costs of court proceedings and other litigation. Any lack of insurance coverage (in whole or in part) for claims brought against the Group by its customers or other third parties could have a material adverse effect on the Group's business, financial condition and results of operations and may negatively impact on the Issuer's ability to satisfy its obligations under the Bonds.

Risks relating to public customers

The Group generates a substantial portion of its revenue from customers in the public sector. Assignments and projects involving the public sector are subject to a number of risks relating to the public sector contracting process. Among others, public sector assignments and projects are generally subject to public procurement (in Swedish: *offentlig upphandling*) rules. Under these rules, services are generally re-tendered on a regular basis, and, as a result, the Group may be required to participate in a tender to maintain existing public contracts and is subject to the risk of losing public sector customers as a result of future tender processes.

The terms and conditions of public sector contracts often have limited or no room for negotiation with a risk of the Group being rejected from the tender if the Group includes reservations that are deemed material. The terms and conditions of public sector contracts can also be more onerous for the Group than private sector contracts and may include, among others, more punitive service level penalties and less advantageous limitations on the Group's liability. In addition, public sector contracts are often subject to more publicity than other contracts and any negative publicity related to such contracts, regardless of the accuracy of such publicity, may adversely affect the Group's business or reputation.

Should any of the above risks materialise, it could significantly reduce the Group's revenue and profit from public sector contracts, which in turn could have a material adverse effect on the Group's business, financial condition and results of operations and may negatively impact on the Issuer's ability to satisfy its obligations under the Bonds.

Risks relating to the use and performance of business partners and sub-consultants

In some cases, the Group depends on business partners and sub-consultants in order to perform services in a timely manner and in compliance with customer agreements. If the Group is unable to engage business partners or sub-consultants at a reasonable cost, or if the amount payable to business partners or sub-consultants exceeds its estimates, the Group's ability to receive or agree about new assignments and projects or complete assignments and projects in a timely manner and/or at the expected profit may be impaired. In addition, if business partners or sub-consultants are unable to deliver their services according to the agreed terms for whatever reason, including (but not limited to) due to financial distress, the Group may be required to buy the services from another source which may not be available at an acceptable price or at all. If business partners or sub-consultants violate labour, environmental or other laws, regulations, policies or codes of conduct, this could also harm the Group's reputation as it may be associated with that of its business partners and sub-consultants.

Each of these factors could have a material adverse effect on the Group's business, financial condition and results of operations and may negatively impact on the Issuer's ability to satisfy its obligations under the Bonds.

Risks relating to the competitive environment

The Group operates in competitive markets and faces current and prospective competition within all of its business segments and geographic markets. There is a risk that the Group may not be able to maintain or increase its market share to the extent that current and future competitors may have greater financial and other resources and/or may be better positioned to adjust to changing market conditions.

A key element of competition faced by the Group is other groups attempting to grow through acquisitions in the same way as the Group, potentially pushing up prices of acquisition targets. Significantly increased competition from one or more competitors within any of the Group's business segments and geographic markets may entail a risk of reduced market shares for the Group. If the Group is unsuccessful in maintaining a competitive position as regards quality, price, delivery certainty, geographic spread, brand recognition, customer service and a broad product range, and/or if it fails to adapt to changing market conditions or otherwise is unsuccessful in competing with its competitors, this may result in a reduced demand for the Group's development and services. Furthermore, the Group's expansion into new countries or markets is subject to certain barriers to entry which could be difficult for the Group to overcome. For example, the Group may not be able to develop the necessary networks and gain sufficient market share in a new country or market, which in turn may result in a failure to realise the expected return on investment. If the Group fails to compete efficiently in its current markets and/or any future new markets, this could have a material adverse effect on the Group's business, financial condition and results of operations and may negatively impact on the Issuer's ability to satisfy its obligations under the Bonds.

Risks relating to sustainability and ESG matters

The provision of sustainability-focused consulting services is a part of the Group's value proposition. If the Group fails to continuously develop its sustainability-focused offering to meet customer demand and respond to evolving legislation, regulation and standards in respect of Environmental, Social and Governance ("ESG") matters, the Group may not be able to compete efficiently. The rapidly evolving legislation, regulation and standards in respect of ESG matters may also pose challenges for the Group relating to navigating the complex legal framework. If the Group fails to meet customer demand in respect of ESG matters and/or adopt and comply with relevant ESG legislation, regulation and standards, this could have a material adverse effect on the Group's business, financial condition and results of operations and may negatively impact on the Issuer's ability to satisfy its obligations under the Bonds.

Risks relating to IT and cyber security

The Group's activities depend on the reliability and security of its information technology ("IT") systems and digital security. The Group's IT systems, some of which are managed by third parties, are susceptible to being compromised, damaged, disrupted or shut down due to, among others, failures during the process of upgrading or replacing software, databases or components, power or

network outages, hardware failures, cyber-attacks (including viruses and computer intrusions), user errors or natural disasters. The cyber threat is constantly evolving and attacks are becoming more sophisticated. The Group and its service providers may not be able to prevent third parties from breaking into the Group's IT systems or gaining access to confidential or sensitive information held in the system, which could, in severe cases, result in significant disruption of the Group's business critical supplies of data. The Group's security measures may not be sufficient to prevent a material disruption, breach, or compromise of its IT systems in the future, which could result in loss of revenue and/or additional costs as well as significant damage to the Group's reputation and business relationships. This could have a material adverse effect on the Group's business, financial condition and results of operations and may negatively impact on the Issuer's ability to satisfy its obligations under the Bonds.

Risks relating to technological developments and artificial intelligence (AI)

For the Group to compete efficiently and grow, the Group must continue to offer relevant and high quality consulting services to address the customer's changing needs. In recent years, there has been an increased interest in, and use and development of, artificial intelligence ("AI"), including in relation to using advanced technologies to enhance decision making and productivity, lower costs and optimise customer experiences, for example via machine learning and by collecting data about individual customers' behaviours to create risk profiles. AI based technologies are still emerging, and their use and potential reach is not yet known. The Group might be required to expend significant resources on the implementation of AI to support its operations. Furthermore, if new technologies emerge, the Group's existing services may face increased competition. Adopting and implementing third-party software (including AI based technologies) into the Group's services may entail technical and business risks and may require considerable investment of technical and financial resources. There is a risk that the Group may not be able to anticipate and respond to technological changes in a timely manner or at all. This may result in decreased demand for the Group's services, which could have a material adverse effect on the Group's business, financial condition and results of operations and may negatively impact on the Issuer's ability to satisfy its obligations under the Bonds.

Risks relating to financial matters and market risks

Risks relating to economic, political and market conditions

Demand for the Group's services is cyclical and may be vulnerable to adverse developments in the economic, political and market conditions, including economic downturns, public sector austerity programmes, reductions in private sector spending and/or reduced activity in the markets in which the Group operates. The international macroeconomic situation has in recent years been characterised by uncertainty due to, among others, increased levels of public debt in many of the leading global economies, interest rate volatility and inflation, the ongoing military conflict in Ukraine, tensions in the Middle East, the European energy crisis, shipping security risks around the Red Sea, supply-chain constraints and restrictions on international trade. In addition, the policies of the current U.S. administration have introduced significant near-term uncertainty with potential longer-term macroeconomic implications, including the broad economic tariffs imposed by the United States against various countries. On February 28, 2026, Israel and the United States commenced a joint operation against Iran, which has led Iran to launch ballistic missiles and drones against Israel and other countries in the region, including the United Arab Emirates, Bahrain and Qatar, as well as against U.S.

targets in the Middle East. In addition, the Strait of Hormuz may be rendered non-operational, leading to disruption of the global supply chain, including in oil and gas, which could potentially destabilize the Israeli and global economies. As of the date of this Prospectus, this operation is undergoing and its outcome and the effect that it may have on our business are uncertain.

As the Group's consultancy services are performed principally in the Nordic region (including Sweden, Denmark, Finland and Norway), the Group is particularly exposed to changes in the economic, political and market conditions in the Nordic markets. The Group recently expanded into the Netherlands and is thereby also exposed to changes in the economic, political and market conditions in the Netherlands. There is a risk that any future increased volatility and deterioration in economic conditions and financial markets particularly in the Nordic region may adversely affect demand for the Group's services. Increasing levels of inflation and higher interest rates could lead to more conservative spending patterns among the Group's customers. Limitations on the availability of capital and/or higher costs of capital for financing expenditures may also cause the Group's customers to reduce their capital budgets and outlays, which in turn could result in project modifications, delays and/or cancellations. Furthermore, if the political climate in the Group's markets change such that the Group's public sector customers are allocated materially smaller budgets for consulting services, the Group's public sector customers may be unable to retain the Group's services.

Any reduction in demand for the Group's services due to adverse developments in the economic, political and/or market conditions could have a material adverse effect on the Group's business, financial condition and results of operations and may negatively impact on the Issuer's ability to satisfy its obligations under the Bonds.

Risks relating to fluctuations in market interest rates

The Group is exposed to the risk of fluctuations in market interest rates. The Group's principal financing comprises the Bonds and a super senior revolving credit facility (the "**Super Senior RCF**"). The Bonds carry a floating interest rate by reference to STIBOR, and the Super Senior RCF carries a floating interest rate by reference to the applicable benchmark rate for the relevant currencies. The Group may also in the future issue or borrow additional debt with a floating interest rate by reference to benchmark rates. Consequently, an increase in STIBOR or other applicable benchmark rates could increase the Group's financing costs in respect of present and/or future debt of the Group. The Group may not enter into interest rate hedging to limit its exposure to fluctuations in market interest rates, and/or any such interest rate hedging may not cover all of the Group's debt with floating interest rate and/or be available at all times.

Any significant increase of the Group's financing costs due to increasing market interest rates could have a negative impact on the Group's liquidity position and could potentially result in a breach of financial covenants under the Group's financing arrangements. This could have a material adverse effect on the Group's financial position and the Issuer's ability to meet its payment obligations under the Bonds.

Risks relating to currency fluctuations

While the Group's functional and operating currency is Swedish krona (SEK), the Group operates within, and generates revenue from, other jurisdictions, including Denmark, Finland, Norway and

the Netherlands. Accordingly, the Group is exposed to foreign currency risks relating to the Danish kroner (DKK), the euro (EUR) and the Norwegian krone (NOK). The Group may also in the future expand into new jurisdictions which may give rise to exposures to other currencies. Changes in the exchange rate between SEK and other currencies to which the Group is exposed may influence the Group's financial results and could have a negative impact on the Group's financial condition and results of operations. The Group does not currently hedge against foreign currency exposure. In some cases, both income and expenses are incurred in the local currency which provides a natural hedge to some extent, but in other cases there is no such match. Consequently, fluctuations in foreign exchange rates could have a material adverse effect on the Group's cash flows and financial position.

Risks relating to the Group's access to financing

The Group's buy-and-build growth strategy is dependent upon continued access to debt financing to finance future acquisitions. In addition, the Group may need to borrow or issue additional debt financing to finance its operations and/or refinance its existing debt financing, including the Bonds. The Group's ability to successfully obtain new debt financing is dependent on the conditions of the capital markets and its financial condition at such time. The Group is principally financed in the Nordic bond market, which has been subject to substantial volatility in recent years stemming from, among others, challenging macroeconomic conditions. The Group's access to financing sources may not be available on favourable terms or at all, which could have a material adverse effect on the Group's business, financial condition and results of operations and thereby on the Issuer's ability to fulfil its obligations under the Bonds.

Customer credit risks

The Group allows its customers to pay the Group on customary terms where payment falls due within various periods of time after the Group has delivered on its obligations. Accordingly, the Group is exposed to the credit risk that a customer delays or defaults on an outstanding payment obligation to the Group in the form of receivables due from the customers to the Group. Financial and operational challenges experienced by the Group's customers may impact the Group's ability to collect outstanding receivables fully or in a timely manner, or at all, which in turn could lead to credit losses. An increase in credit losses or failure by customers to meet their payment obligations towards the Group could have an adverse impact on the Group's liquidity and income as a consequence of bad debt. If a number of the Group's customers delay or default on their payment obligations, or if certain of the Group's larger customers delay or default on a consistent basis, the loss of revenue may have a material adverse effect on the Group's business, financial condition and results of operations and may negatively impact on the Issuer's ability to satisfy its obligations under the Bonds.

Risks relating to laws, regulations and compliance

Risks relating to Swedish and international tax legislation

The Group is subject to Swedish and foreign tax legislation applicable to its activities, including (but not limited to) rules on transfer pricing and value added tax. As a consequence of globalisation and growing world trade, tax authorities worldwide have increased their focus on transfer pricing with respect to cross-border intra-group transactions. In the event that the Group's operations

inadvertently violated transfer pricing rules, this could result in an increased tax cost. If the competent authorities in any of the jurisdictions in which the Group operates do not agree with the Group's assessment, there is a risk that the Group's transfer pricing regime may be subject to challenge, which could result in increased taxes and/or other costs to the Group.

The applicable Swedish and foreign tax legislation may change from time to time, which could also result in an increase of the Group's tax liabilities. Tax laws are complex and subject to subjective evaluations and interpretative decisions. The Group may be subject to tax audits aimed at assessing its compliance with direct and indirect taxes, and there is a risk that the tax position taken by the Group differs from the tax authorities' interpretation of the applicable Swedish and foreign tax legislation, which may lead to increased tax liabilities and other penalties. Relatedly, the Group may from time to time be involved in disputes regarding its tax position with the relevant tax authorities. Any such disputes may result in increased taxes and/or penalties if the matter is decided against the Group, as well as costs relating to conducting administrative and/or legal proceedings.

Any failure by the Group to comply with applicable Swedish and foreign tax legislation, any changes to applicable Swedish and foreign tax legislation and/or any unfavorable outcomes from current or future disputes or proceedings could have a material adverse effect on the Group's business, financial condition and results of operations.

Risks relating to General Data Protection Regulation (GDPR)

The Group processes personal data, including both customer data and data of its employees. The Group is processing, among others, sensitive information concerning bank accounts and agreements. The customers could suffer if such information would fall into the wrong hands due to failures or breaches of the IT systems utilised by the Group to process personal data or due to unsatisfactory data protection practices.

The Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation) (the "GDPR") is applicable in all EU member states and includes requirements for the handling of personal data. Ensuring compliance with GDPR in the context of the Group remains challenging and there is a risk that the measures taken by the Group to maintain and process personal data of its customers and employees in compliance with the GDPR could prove to be insufficient or that, for instance, a misinterpretation of the GDPR would lead to the Group being considered not fully compliant. Failure to comply with the GDPR may subject the Group to significant monetary sanctions and claims for damages.

Risks relating to changes in law and regulation

The Group is subject to numerous laws and regulations applicable to, among others, the consultancy services offered by the Group, acquisitions undertaken by the Group as well as employment matters. Changes in laws and regulations or the interpretation thereof applicable to the Group or the introduction of new laws and regulations could increase compliance costs, impact the financial position of the Group, mandate significant costly changes to the way the Group operates and/or impact the Group's ability to increase or maintain competitive prices for its products and services. In addition,

failure to comply with applicable laws and regulations can lead to civil, administrative or criminal penalties and may also harm the Group's reputation. Any of these developments, alone or in combination, could have a material adverse effect on the Group's business, financial condition and results of operations and may negatively impact on the Issuer's ability to satisfy its obligations under the Bonds.

Risks relating to the Bonds

Risks relating to credit risks in respect to the Bonds and refinancing risk

Bondholders carry a credit risk towards the Issuer and the Guarantors. Bondholders' likelihood of receiving payment under the Bonds is therefore dependent upon the Issuer's and the Guarantors' ability to meet their respective payment obligations, which in turn is largely dependent upon the performance of the Group's operations and its financial position. The credit risk and the Group's financial position are affected by several factors of which some are mentioned above in the section "*Risks relating to the Issuer and the Group*" and also, as further described under section "*The Issuer's dependence on its subsidiaries and the Issuer's ability to service the debt*" below.

Should the Issuer be unable to make repayment under the Bonds, there is a risk that the Bondholders would find it difficult or impossible to recover the amounts owed to them under the Bonds. Furthermore, there is a risk that an increased credit risk will cause the market to charge the Bonds a higher premium, which will affect the value of the Bonds negatively.

Another aspect of credit risk is that a deteriorating financial position of the Group may force the Issuer to refinance the Bonds instead of redeeming the Bonds with cash generated by the Group's operations. The Issuers' ability to successfully refinance the Bonds and other existing external financing depends on, among other things, the conditions of debt capital markets and its financial condition at such time. Should the Issuer be unable to refinance its debt obligations on favourable terms, or at all, it would have a material adverse negative effect on the Group's business, financial position and its results, and in effect, on the Bondholders' recovery under the Bonds.

Risks related to the intercreditor arrangements

The Issuer may incur additional debt under one or several super senior revolving credit facilities (a "**Super Senior RCF**") which, in accordance with the terms of an Intercreditor Agreement (as defined below), ranks senior to the Bonds. Further, the Issuer may incur additional financial indebtedness which will rank *pari passu* with the Bonds. The relation between certain of the Issuer's creditors (jointly the "**Secured Creditors**") and the security agent are governed by an intercreditor agreement (the "**Intercreditor Agreement**"). Although the obligations under the Bonds and certain other obligations of the Group towards the Bondholders and the Secured Creditors are secured by first priority security, there is a risk that the proceeds of any enforcement sale of the security assets will not be sufficient to satisfy all amounts then owed to the Secured Creditors. Furthermore, if the Issuer issues subsequent Bonds, the security position of the current Bondholders may be impaired.

The security agent will in accordance with the Intercreditor Agreement in some cases take instructions from a super senior representative under the Super Senior RCFs. There is a risk that the security agent and/or a super senior representative under the Super Senior RCFs will act in a manner or give instructions not preferable to the Bondholders. In addition, the security agent will in some cases take instructions from a senior representative, being those Senior Creditors whose Senior Debt at that time aggregate to more than 50 per cent. of the total Senior Debt. If the outstanding Senior Debt towards other senior creditors than the Bondholders exceed the obligations under the Bonds, the Bondholders will therefore not be in a position to control the enforcement procedure.

If the outstanding obligations of the Group towards other Secured Creditors than the Bondholders increase, there is a risk that the security position of the Bondholders is impaired. Furthermore, there is a risk that the security will not at all times cover the outstanding claims of the Secured Creditors.

The Intercreditor Agreement also contains provisions regarding the application of proceeds from an enforcement of security where any agent will receive payments first, secondly any creditor under any Super Senior Debt (including liabilities under Hedging Obligations) and thirdly any creditor *pro rata* under any Senior Debt (including the Bondholders). Any shareholder, intercompany and subordinated debt will rank junior to the Secured Creditors. There is a risk that the enforcement proceeds will not be sufficient in order for the Issuer to satisfy the waterfall provisions above.

Ability to comply with the Terms and Conditions

The Group is required to comply with the Terms and Conditions, *inter alia*, to pay interest under the Bonds. Events beyond the Group's control, including changes in the economic and business conditions in which the Group operates, may affect the Group's ability to comply with, among other things, the undertakings set out in the Terms and Conditions. A breach of the Terms and Conditions could result in a default under the Terms and Conditions, which could lead to an acceleration of the Bonds, resulting in the Issuer having to repay the Bondholders at the applicable call premium. It is possible that the Issuer will not have sufficient funds at the time of the repayment to make the required redemption of Bonds.

There is a risk that the Group may default under its future financing arrangements (including the Terms and Conditions). Additionally, the lenders under any such financing agreement may not grant waivers or required consents to breaches and there is thus a risk that the relevant creditors accelerate their claims on the Group, which will be detrimental to the possible recovery of the bondholders. Historically, the Group has occasionally been in breach of its existing financing, which has in such cases been mitigated by waivers.

Risks relating to the transaction security

Although the Issuer's obligations towards the Bondholders are secured by first ranking pledges over the shares in the Issuer and each Guarantor and claims under certain material intragroup loans of Group companies, there is no assurance that the proceeds from the enforcement of the secured assets will be sufficient to fully satisfy all amounts owed to the Bondholders.

The Bondholders are represented by Nordic Trustee & Agency AB (publ) as the security agent (the "**Security Agent**") in all matters related to the transaction security. There is a risk that the Security Agent, or anyone appointed by it, may fail to properly fulfil its obligations in perfecting, maintaining, enforcing, or taking other necessary actions concerning the transaction security. As a result of such contractual provisions, Bondholders will not have the ability to take enforcement action in respect of the transaction security except through the Security Agent.

In certain jurisdictions, the creation, perfection, and enforcement of security interests may be governed by specific local laws that may present challenges and introduce risks to the validity and enforceability of the transaction security. Additionally, the transaction security in such jurisdictions may be subject to certain hardening periods, during which Bondholders may not fully benefit from

the transaction security or may face limitations on the realisation of the security, especially in the context of insolvency proceedings.

Bondholders also bear the risk associated with the possible insolvency or bankruptcy of the Security Agent, or a breach of its obligations as Security Agent, as described in the section “*The rights of Bondholders depend on the Agent’s and the Security Agent’s actions and financial standing*” below.

The Security Agent is authorised to enter into agreements with members of the Group or third parties or take other necessary actions to maintain, release, or enforce the transaction security or for the purpose of settling any matters concerning the Bondholders’ rights to the security.

Risks relating to enforcement of the transaction security

If a Group Company, of which the shares have been pledged in favour of the Bondholders, becomes subject to foreclosure, dissolution, winding-up, liquidation, recapitalisation, administrative or other bankruptcy or insolvency proceedings, the shares subject to such pledge may lose significant value. This is because the subsidiary’s obligations must first be satisfied during the insolvency proceedings, potentially leaving little or no assets remaining for the Bondholders. As a result, the Bondholders may not recover the full value (or any value in the case of an enforcement sale) of the shares. Furthermore, the value of the shares subject to pledges may decline over time, especially if the underlying Group company is in financial distress or subject to insolvency proceedings.

The value of any intra-group loan granted by the Issuer or a Guarantor to any subsidiary, which is secured in favour of the Bondholders, is primarily dependent on the ability of that subsidiary to repay its loan. If the subsidiary is unable to fulfil its debt obligations following an enforcement of the pledge over the intra-group loan, the Bondholders may not recover the full or any value of the security granted over the intra-group loan. Since security over intragroup loans are not perfected at the time of entry into the relevant security documents, but instead upon the occurrence of a pre-agreed trigger event, there is a risk that hardening periods will apply in respect of such security following its perfection, with subsequent risk for recovery of security, which may result in Bondholders not fully benefitting from such transaction security or risk facing limitations in relation to enforcement of such security, especially in the context of insolvency proceedings.

In the event that the proceeds from an enforcement action are insufficient to fully repay all amounts due under or in respect of the Bonds, the Bondholders will only have an unsecured claim against the Issuer and its remaining assets (if any) for the outstanding amounts under or in respect of the Bonds.

There is a risk that the insolvency, bankruptcy proceedings or similar in other jurisdictions where assets are subject to security may limit the ability of the Bondholders to enforce their security interests over the relevant secured assets. The Bondholders may face delays or challenges in enforcing their security rights. Local bankruptcy laws may create complexities, including preferences granted to certain creditors that could limit the Bondholders’ ability to recover value from enforcement of the pledged shares, loans or real properties. Bankruptcy and liquidation procedures could significantly impact the value of the secured assets. In certain jurisdictions, the legal framework regarding enforcement of security interests may be less developed, creating further uncertainty regarding the realisation of value from pledged assets.

Should the proceeds from enforcement actions be insufficient to cover all amounts due under the Bonds, the Bondholders will have only an unsecured claim against the Issuer, and any remaining assets available for distribution may be limited or non-existent.

Please also refer to the section “*Corporate benefit limitations in providing guarantees and security to the Bondholders*” below.

Rules on capital maintenance

Enforcement of a guarantee or security provided in accordance with the Terms and Conditions may be limited by the capital maintenance rules imposed under local laws in addition to the express limitations contained in the relevant guarantee or security agreements.

Capital maintenance rules may be applicable in Finland, Denmark and Norway and other countries and may prevent the reduction of share capital if it would leave the company unable to satisfy its obligations. As such, enforcement of a guarantee or security provided in accordance with the Terms and Conditions may be limited by the capital maintenance which could prohibit the reduction of the relevant company’s registered share capital to below certain levels and direct or indirect repayment of registered share capital to shareholders, including payments made under guarantees or security in favour of obligations of a direct or indirect shareholder. As a result, enforcement may be restricted if payments under or enforcement of the security documents would reduce the amount of its registered share capital below certain levels and prohibitions on capital reductions could negatively impact creditors’ rights

The above-mentioned jurisdictions may also impose restrictions on the payment of dividends, capital reductions, and other distributions to shareholders if such payments would affect the company’s ability to pay creditors. Therefore, enforcement of guarantees or security in these countries may be limited if payments under or enforcement of the Transaction Documents would lead to a breach of capital maintenance rules or reduce the company’s ability to meet its obligations. The restrictions may vary by jurisdiction.

In certain jurisdictions rules may apply prohibiting the return of capital to shareholders in a way that could affect the solvency of the company. Enforcement of guarantees or security in such jurisdictions may be constrained if such payments would reduce the company’s registered capital below required levels. Any enforcement action that leads to a reduction of capital could be limited by such rules.

In all these jurisdictions, the application and interpretation of capital maintenance rules may evolve over time. There is no certainty that the future interpretation of these laws or new rulings may not adversely affect the enforceability of the guarantees or security provided under the relevant agreements.

Corporate benefit and financial assistance limitations in providing guarantees and security to the Bondholders

In general, under Swedish law as well as foreign law, if a limited liability company provides security and/or guarantees for another party’s obligations without deriving sufficient corporate benefit therefrom, the granting of security and/or guarantees will require the consent of all shareholders of the

grantor and will only be valid up to the amount the company could have distributed as dividend to its shareholders at the time the security and/or guarantees were provided. If no corporate benefit is derived from the security and/or guarantees provided, or if the security and/or guarantees are limited by financial assistance limitations, the security and/or guarantees will be limited in validity. Consequently, any security and/or guarantee granted by a subsidiary of the Issuer could therefore be limited which would have an adverse effect on the Bondholders' security position.

The Issuer's dependence on its subsidiaries and the Issuer's ability to service the debt

A significant part of the Group's assets and revenues relate to the Issuer's subsidiaries. Accordingly, the Issuer is dependent upon receipt of sufficient income and cash flow related to the operation of and the ownership in the subsidiaries to enable it to make payments under the Bonds. Consequently, the Issuer is dependent on the subsidiaries' availability of cash, and their legal ability to make dividends which may from time to time be limited by corporate restrictions and law. Should the Issuer not receive sufficient income from its subsidiaries, the bondholder's ability to receive payment under the Terms and Conditions may be adversely affected.

The Issuer's ability to service its debt under the Bonds depends upon, among other things how the Group's future financial and operating performance will be affected by prevailing economic conditions and financial, business, regulatory and other factors, some of which are beyond the Group's control. If the Group's operating income is not sufficient to service its current or future indebtedness, the Group will be forced to take actions such as reducing or delaying its business activities, acquisitions, investments or capital expenditures, selling assets, restructuring or refinancing its debt or seeking additional equity capital. There is a risk that the Group will not be able to affect any of these remedies on satisfactory terms, or at all. This would have a negative effect on the Group's operations, earnings, results and financial position.

Subsidiaries, structural subordination and insolvency of subsidiaries

All assets of the Group are owned by, and all revenues are generated in, the subsidiaries of the Issuer. The subsidiaries are legally distinct from the Issuer and have no obligation to make payments to the Issuer of any profits generated from their business. The ability of the subsidiaries to make payments to the Issuer is restricted by, among other things, the availability of funds, corporate restrictions and legal restrictions (e.g. limitations on value transfers).

If the Issuer is not able to receive funds by way of dividends, licenses, service fees or value transfer from one or more subsidiary, this could affect the Issuer's ability to service its payment obligations under the Bonds which would have a material adverse effect on the Issuer's business, financial position, earnings and result.

The Group or its assets may not be protected from any actions by the creditors of any subsidiary of the Group, whether under bankruptcy law, by contract or otherwise. In particular, the Terms and Conditions allows the Group to incur certain debt at subsidiary level. The lenders of such debt would be structurally senior to the Bondholders in an insolvency scenario with direct claims against the relevant subsidiaries of the Issuer. These claims could reduce the value of the subsidiaries available to repay the claims of the Bondholders in an enforcement scenario.

In addition, defaults by, or the insolvency of, certain subsidiaries of the Group could result in the obligation of the Group to make payments under parent company financial or performance guarantees in respect of such subsidiaries' obligations or the occurrence of cross defaults on certain borrowings of the Group.

Security over assets granted to third parties

Subject to certain limitations from time to time, the Issuer may incur additional financial indebtedness and provide additional security for such indebtedness. In particular, the Terms and Conditions permits the Group to incur up to the higher of (i) SEK 110,000,000 (or its equivalent in another currency or currencies) and (ii) 15.00 per cent. of EBITDA of the Group with separate security over the assets. Where security is granted in favour of a third-party debt provider, the Bondholders will, in the event of bankruptcy, re-organisation or winding-up of the Issuer, be subordinated in right of payment out of the assets being subject to security provided to such third party debt provider. In addition, if any such third-party debt provider holding security provided by the Group were to enforce such security due to a default by any company within the Group under the relevant finance documents, such enforcement could have a material adverse effect on the Group's assets, operations and, ultimately, the financial position of the Bondholders.

Interest rate risks

The Bonds' value depends on several factors, one of the most significant over time being the level of market interest. The Bonds bear a floating rate interest of STIBOR 3 months plus a margin and the interest of the bonds. Hence, the interest rate is to a certain extent adjusted for changes in the level of the general interest rate. There is a risk that an increase of the general interest rate level will adversely affect the value of the Bonds. The general interest rate level is to a high degree affected by the Swedish and the international financial development and is outside the Group's control.

Liquidity risks and secondary market

Even if the Bonds are admitted to trading on Nasdaq Stockholm, an active trading in the Bonds may not occur and a liquid market for trading in the Bonds may not develop. This may result in that the Bondholders cannot sell their Bonds when desired or at a price level which allows for a profit comparable to similar investments with an active and functioning secondary market.

Lack of liquidity in the market may have a negative impact on the market value of the Bonds. Furthermore, the nominal value of the Bonds may not be indicative compared to the market price of the Bonds if the Bonds are admitted for trading on a regulated market. The market price of the Bonds could be subject to significant fluctuations in response to actual or anticipated variations in the Group's operating results and those of its competitors, adverse business developments, changes to the regulatory environment in which the Group operates, changes in financial estimates by securities analysts and the actual or expected sale of a large number of Bonds, general price and volume fluctuations on the financial markets, as well as other factors. It should also be noted that during a given time period it may be difficult or impossible to sell the Bonds (at all or at reasonable terms) due to, for example, severe price fluctuations, close down of the relevant market or trade restrictions imposed on the market.

Benchmark Regulation

The process for determining STIBOR and other interest-rate benchmarks is subject to a number of legislative acts and other regulations. Some of these acts and regulations have already been implemented whilst some are set to be implemented in the near future. The most extensive initiative in this respect is the Benchmark Regulation (Regulation (EU) 2016/1011 of the European parliament and of the council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014).

The Benchmark Regulation came into force on the 1 January 2018. The Benchmark Regulation addresses the provision of benchmarks, the contribution of input data to benchmarks and the use of benchmarks within the European Union. The effect of the Benchmark Regulation cannot yet be fully determined due, among other things, to the limited time period that the regulation has applied. However, there is a risk that the Benchmark Regulation will affect how certain benchmarks are determined and how they develop in the future. This could, for example, lead to increased volatility regarding some benchmarks. A further potential risk is that increased administrative requirements, and resulting regulatory risk, may discourage stakeholders from participating in the production of benchmarks, or that some benchmarks cease to be provided. If this would happen in respect of benchmark that is used for the Bonds, it could potentially have negative effects for the Bondholders.

Currency risks

The Bonds are denominated and payable in SEK. If bondholders in the Bonds measure their investment return by reference to a currency other than SEK, an investment in the Bonds entails foreign exchange-related risks due to, among other factors, possible significant changes in the value of the SEK relative to the currency by reference to which bondholders measure the return on their investments. This could cause a decrease in the effective yield of the Bonds below their stated coupon rates and could result in a loss to bondholders when the return on the Bonds is translated into the currency by reference to which the bondholders measure the return on their investments. Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate or the ability of the Issuer to make payments in respect of the Bonds. As a result, there is a risk that bondholders may receive less interest or principal than expected, or no interest or principal.

Ownership of the Issuer

The Issuer is controlled by shareholders whose interest may conflict with those of the Bondholders, particularly if the Group encounters difficulties or is unable to pay its debts as they fall due. The shareholders will have the ability to elect the board of directors. Furthermore, the shareholders may also have an interest in pursuing acquisitions, divestitures, financings or other transactions that, in their judgment, could enhance their equity investments, although such transactions might involve risks to the Bondholders. There is nothing that prevents the shareholders or any of their affiliates from acquiring businesses that directly compete with the Group. If such an event were to arise, it could have a material negative impact on the Group's operations, earnings and financial position. According to the Terms and Conditions, if a change of control event occurs, the Bondholders have however a right of prepayment of the Bonds (Put Option). There is thus a risk that the Issuer does

not have enough liquidity to repurchase the Bonds if the Bondholders use its right of prepayment, see further under Section “*Put Option*” below.

Put Option

The Terms and Conditions includes a put option meaning that the Bonds are subject to prepayment at the option of each Bondholder at 101 per cent. of the Nominal Amount plus accrued and unpaid interest upon the occurrence of a Change of Control Event, Listing Failure Event or a De-Listing.

There is, however, a risk that the Issuer will not have sufficient funds at the time of such prepayment to make the required prepayment of the Bonds which could adversely affect the Issuer, e.g. by causing insolvency or an event of default under the Terms and Conditions, and thus adversely affect all Bondholders and not only those that choose to exercise the option.

Risks related to early redemption

Under the Terms and Conditions for the Bonds, the Issuer has reserved the possibility to redeem all outstanding Bonds before the final redemption date. If the Bonds are redeemed before the final redemption date, the holders of the Bonds have the right to receive an early redemption amount which exceeds the nominal amount in accordance with the Terms and Conditions for the Bonds. However, there is a risk that the market value of the Bonds is higher than the early redemption amount and that it may not be possible for Bondholders to reinvest such proceeds at an effective interest rate as high as the interest rate on the Bonds and may only be able to do so at a significantly lower rate. It is further possible that the Issuer will not have sufficient funds at the time of the mandatory prepayment to carry out the required redemption of Bonds.

No action against the Issuer and Bondholders’ representation

In accordance with the Terms and Conditions for the Bonds, the Agent represents all Bondholders in all matters relating to the Bonds and the Bondholders are prevented from taking actions on their own against the Issuer. Consequently, individual Bondholders do not have the right to take legal actions to declare any default by claiming any payment from the Issuer and may therefore lack effective remedies unless and until a requisite majority of the bondholders agree to take such action. However, there is a risk that an individual Bondholder, in certain situations, could bring its own action against the Issuer (in breach of the Terms and Conditions for the Bonds), which could negatively impact an acceleration of the Bonds or other action against the Issuer.

To enable the Agent to represent Bondholders in court, the Bondholders and/or their nominees may have to submit a written power of attorney for legal proceedings. The failure of all Bondholders to submit such a power of attorney could negatively affect the legal proceedings. Under the Terms and Conditions for the Bonds, the Agent will in some cases have the right to make decisions and take measures that bind all Bondholders. Consequently, there is a risk that the actions of the Agent in such matters will impact a Bondholder’s rights under the Terms and Conditions for the Bonds in a manner that is undesirable for some of the Bondholders.

In addition, under foreign insolvency laws, the validity of an appointment of an agent for service of process granted by a foreign entity, such as the appointment by the Issuer of agents for service of

process under e.g. Swedish law may be limited and the appointment may terminate in the case of an insolvency of the Issuer. As such, the ability of the Agent to bring suit against the Issuer or any guarantor in Sweden, on behalf of the Bondholders, may be limited.

Bondholders' meetings

The Terms and Conditions for the Bonds include certain provisions regarding Bondholders' meetings. Such meetings may be held in order to resolve on matters relating to the Bondholders' interests. The Terms and Conditions for the Bonds allow for stated majorities to bind all Bondholders, including Bondholders who have not taken part in the meeting and those who have voted differently to the required majority at a duly convened and conducted Bondholders' meeting. Consequently, there is a risk that the actions of the majority in such matters will impact a Bondholder's rights in a manner that is undesirable for some of the Bondholders.

Risks related to the Agent failing to take action

By subscribing for, or accepting the assignment of, any Bond, each holder of a Bond accepts the appointment of the Agent (being on the issue date Nordic Trustee & Agency AB (publ)) to act on its behalf and to perform administrative functions relating to the Bonds and to hold the transaction security on behalf of the Bondholders. Each of the Agent shall have, among other things, the right to represent the Bondholders in all court and administrative proceedings in respect of the Bonds. However, the rights, duties and obligations of the Agent and the Security Agent as the representative of the Bondholders is subject to the provisions of the Finance Documents, and there is no specific legislation or market practice in Sweden (under which laws the Terms and Conditions are governed) which would govern the Agent's performance of its duties and obligations relating to the Bonds. There is a risk that a failure by the Agent or the Security Agent to perform its duties and obligations properly or at all will have an adverse effect on the enforcement of the rights of the Bondholders.

Furthermore, the Security Agent's authority to represent Bondholders in formal Swedish proceedings (such as bankruptcies, company reorganisations, or in connection with enforcement of security) has recently faced legal challenges. In a notable case, a court ruled against this type of representative capacity, preventing Bondholders from taking action against the issuer through the Security Agent. Although this ruling is not yet a legally binding precedent, if Swedish courts continue to uphold such judgments, or if regulators fail to establish this representative right in legislation, it may be difficult for Bondholders to effectively protect their rights under the Bond terms in formal court proceedings. This legal uncertainty potentially undermines the conventional bond structure and could necessitate alternative enforcement mechanisms or individual action by Bondholders, which would be considerably less efficient and more costly than the intended collective representation through the Security Agent.

Both the Agent and the Security Agent may be replaced by a successor Agent or Security Agent (as applicable) in accordance with the Terms and Conditions. Generally, the successor Agent or Security Agent has the same rights and obligations as the retired Agent or Security Agent (as applicable). It may be difficult to find a successor Agent or Security Agent with commercially acceptable terms or at all. Further, there is a risk that the successor Agent or Security Agent would breach its obligations under the above documents or that insolvency proceedings would be initiated against it.

The materialisation of any of the above risks may have an adverse effect on the enforcement of the rights of the Bondholders, including the right to receive payments under the Bonds.

STATEMENT OF RESPONSIBILITY

The Board of Directors authorised the issuance of the Initial Bonds on 11 June 2025, the First Subsequent Bonds on 1 December 2025 and the Second Subsequent Bonds on 4 June 2026. Corporate Governance

Governance

The Group's corporate governance is aimed at sustainable value creation for shareholders through good risk control and a sustainable and sound corporate culture. The Group has a clear division of roles and responsibilities between the Group management, and the respective Board of Directors and shareholders.

In its decision making and administration, in order to ensure that control over the Company and the other Guarantors are not abused, the Company and each of the other Guarantors follow the provisions of applicable law and relevant regulations, entailing, *inter alia*, that the Board of Directors and the shareholders in each company observes the rules regarding corporate governance in the Swedish Companies Act (Sw. *aktiebolagslagen (2005:551)*), the Finnish Companies Act (624/2006, Fi. *osakeyhtiölaki*), the Danish Companies Act (Da. *selskabsloven*) and the Norwegian Companies Act (No. *lov om aksjeselskaper*), and that the shareholders exercise their influence through active participation in the decisions made at the shareholder' meeting. Further, each Group Company's Articles of Association are observed.

Moreover, the Group has implemented policies to ensure that roles and responsibilities are appropriately divided between the respective Group management, the Board of Directors and shareholders in accordance with applicable laws and regulations. The Group has, *inter alia*, adopted a policy regarding “*Rules of Procedure for the Board of Directors and Instructions for the CEO, including Instructions for financial reporting*”. In order to ensure that control over the Company and the other Guarantors are not abused, the Group acts in accordance with the rules of procedure for the Board and the instructions for the CEO. Remuneration and audit matters are handled by the respective Board of Directors through its appointed board members.

Conflict of interest

The Group is not aware of any conflicts of interests or potential conflicts of interest between the duties of the members of the Board of Directors and the members of management towards the Company or the other Guarantors, respectively, and their private interests and/or other duties. Several members of the Board of Directors and senior management have financial interests in the Company and the other Guarantors through their indirect shareholdings in the Issuer. The Company does not consider this to constitute a conflict of interest.

LEGAL AND OTHER INFORMATION

Material agreements

The following is a summary of the material terms of material agreements to which the Issuer and/or any of the other Guarantors is a party and is considered to be outside of the ordinary course of business. The description set out below does not purport to describe all of the applicable terms and conditions of such agreements.

Guarantee and Adherence Agreement

The Guarantee and Adherence Agreement dated 22 September 2025 was entered into between, amongst others, the Issuer, the Guarantors (as defined therein) and the Security Agent for itself and on behalf of the Secured Parties, including the Bondholders. Pursuant to the Guarantee and Adherence Agreement, each Guarantor has irrevocably and unconditionally, jointly and severally (Sw. *solidariskt*), but subject to any limitations set out therein or in any accession letter:

- (a) guaranteed to each Secured Party, as represented by the Security Agent, as principal obligor and as for its own debt (Sw. *såsom för egen skuld*) the full and punctual payment and performance by the Obligor of the Secured Obligations including, but not limited to, the payment of principal and interest under the Finance Documents when due, whether at maturity, by acceleration, by redemption or otherwise, and interest on any such obligation which is overdue, and of all other monetary obligations of the Obligor to the Secured Parties under the Finance Documents;
- (b) agreed with each Secured Party that if any obligation guaranteed by it, is or becomes unenforceable, invalid or illegal, it will, as an independent and primary obligation, indemnify the Secured Parties promptly on demand against any cost, loss or liability which any of the Secured Parties incurs as a result of any Obligor not paying any amount which would, but for such unenforceability, invalidity or illegality, have been payable by such Obligor under the Finance Documents on the date when it would have been due. The amount payable by a Guarantor under paragraph (b) of the Guarantee and Adherence Agreement will not exceed the amount which the Guarantor would have had to pay under Clause 2 of the Guarantee and Adherence Agreement if the amount claimed had been recoverable on the basis of a guarantee; and
- (c) except as set forth in the Guarantee and Adherence Agreement and the Intercreditor Agreement, agreed that the obligations of the Guarantors thereunder shall not be affected by:
 - (i) the failure of any Secured Party to assert any claim or demand or to enforce any right or remedy against the Issuer, the borrowers under the Super Senior RCF, the other Guarantors or any other person under the Finance Documents or any other agreement or otherwise;
 - (ii) any extension or renewal or refinancing of any debt under any Finance Document.

Pursuant to the Intercreditor Agreement, the Guarantees shall be granted with first priority ranking in respect of the Super Senior Debt and the Senior Debt, *pari passu* between the Super Senior Debt and the Senior Debt (each term as defined in the Intercreditor Agreement, but subject always to the allocation of proceeds provision as set out in the Intercreditor Agreement).

Security Agreements

The Issuer and certain Guarantors and the Security Agent have entered into certain security agreements (the “**Group Security Agreements**”). Pursuant to the Security Agreements and subject to applicable limitations set out or referred to therein, the Issuer or the relevant Guarantor (as applicable) has agreed to grant security over (with the priority as between the Secured Parties as set out in the Intercreditor Agreement) all its rights, title and interest in and to shares in certain Guarantors and/or certain intercompany loans in favour of the Secured Parties, being represented by the Security Agent, as security for the due and punctual performance by the Obligors of the Secured Obligations (each term as defined therein). The Security Agreements are governed by Swedish, Danish, Finnish and Norwegian law, as applicable.

In addition, XPartners Group Holding AB (publ), Reg. No. 559307-3900 (the “**Parent**”), has entered into (i) a share pledge agreement (the “**Parent Share Pledge Agreement**”) with the Security Agent, pursuant to which the Parent has pledged all of its shares in the Issuer in favour of the Secured Parties, represented by the Security Agent, as security for the due and punctual performance by the Obligors of the Secured Obligations, and (ii) a pledge agreement in respect of claims under any Subordinated Loans (the “**Parent Loans Pledge Agreement**”) and, together with the Parent Share Pledge Agreement, the “**Parent Security Agreements**”) with the Security Agent, pursuant to which the Parent has pledged all of its rights, title and interest in and to any Subordinated Loans granted by the Parent to the Issuer in favour of the Secured Parties, represented by the Security Agent, as security for the due and punctual performance by the Obligors of the Secured Obligations (each term as defined therein). The Parent Security Agreements are provided on a limited recourse basis. The Parent Security Agreements are governed by Swedish law.

Intercreditor Agreement

The Intercreditor Agreement dated 24 June 2025 was entered into between, amongst others, the Issuer, the Original Super Senior RCF Creditors under the Super Senior RCF, the Facility Agent under the Super Senior RCF (each term as defined therein), the Security Agent and the Agent (representing the Bondholders).

The Intercreditor Agreement sets out: (i) the ranking of certain indebtedness of the debtors; (ii) the ranking of certain security granted by the debtors; (iii) when payments can be made in respect of certain indebtedness of the debtors; (iv) when enforcement actions can be taken in respect of that indebtedness; (v) the terms pursuant to which that indebtedness will be subordinated upon the occurrence of certain insolvency events; (vi) turnover provisions; and (vii) when security and guarantees will be released to permit a sale of any assets subject to security.

The Intercreditor Agreement is governed by Swedish law.

Super Senior RCF agreement

The SEK 900,000,000 super senior revolving credit facilities agreement, dated 24 June 2025, was entered into between the Issuer as company and original borrower, the financial institutions listed therein as original lenders, Danske Bank A/S and Nykredit Bank A/S as arrangers and Danske Bank A/S as agent (the “**Super Senior RCF**”).

The Super Senior RCF may be used, *inter alia*, towards financing or refinancing (directly or indirectly) general corporate purposes of the Group (including acquisitions, capital expenditure and interest, fees, costs and expenses).

The Super Senior RCF is governed by Swedish law.

For the avoidance of doubt, the Issuer will not be obliged to take any such actions until obliged to do so pursuant to paragraph (b) below.

- (j) The Agent shall ensure that it receives evidence satisfactory to it that Finance Documents which are required to be delivered to the Agent are duly authorised and executed (as applicable). The Issuer shall promptly upon request provide the Agent with such documents and evidence as the Agent reasonably considers necessary for the purpose of being able to comply with this paragraph (j). Other than as set out above, the Agent shall neither be liable to the Issuer or the Bondholders for damage due to any documents and information delivered to the Agent not being accurate, correct and complete, unless it has actual knowledge to the contrary, nor be liable for the content, validity, perfection or enforceability of such documents.

- (k) Notwithstanding any other provision of the Finance Documents to the contrary, the Agent is not obliged to do or omit to do anything if it would or might in its reasonable opinion constitute a breach of any regulation.
- (l) If in the Agent's reasonable opinion the cost, loss or liability which it may incur (including reasonable fees) in complying with instructions of the Bondholders, or taking any action at its own initiative, will not be covered by the Issuer, or the Bondholders (as applicable), the Agent may refrain from acting in accordance with such instructions, or taking such action, until it has received such funding or indemnities (or adequate Security has been provided therefore) as it may reasonably require.
- (m) Unless it has actual knowledge to the contrary, the Agent may assume that all information provided by or on behalf of the Issuer (including by its advisors) is correct, true and complete in all aspects.
- (n) The Agent shall give a notice to the Bondholders (i) before it ceases to perform its obligations under the Finance Documents by reason of the non-payment by the Issuer of any fee or indemnity due to the Agent under the Finance Documents or (ii) if it refrains from acting for any reason described in Clause 21.2(1).

21.3 Limited liability for the Agent

- (a) The Agent will not be liable to the Bondholders for damage or loss caused by any action taken or omitted by it under or in connection with any Finance Document, unless directly caused by its negligence or wilful misconduct. The Agent shall not be responsible for indirect or consequential loss.
- (b) The Agent shall not be considered to have acted negligently if it has acted in accordance with advice from or opinions of reputable external experts provided to it or if it has acted with reasonable care in a situation when it considers that it is detrimental to the interests of the Bondholders to delay the action in order to first obtain instructions from the Bondholders.
- (c) The Agent shall not be liable for any delay (or any related consequences) in crediting an account with an amount required pursuant to the Finance Documents to be paid by it to the Bondholders, provided that it has taken all necessary steps as soon as reasonably practicable to comply with the regulations or operating procedures of any recognised clearing or settlement system used by it for that purpose.
- (d) The Agent shall not have any liability to the Issuer or the Bondholders for damage caused by it acting in accordance with instructions of the Bondholders given in accordance with the Finance Documents.
- (e) Any liability towards the Issuer which is incurred by the Agent in acting under, or in relation to, the Finance Documents shall not be subject to set-off against the obligations of the Issuer to the Bondholders under the Finance Documents.
- (f) The Agent is not liable for information provided to the Bondholders by or on behalf of the Issuer or any other Person.

21.4 Replacement of the Agent

- (a) Subject to Clause 21.4(f), the Agent may resign by giving notice to the Issuer and the Bondholders, in which case the Bondholders shall appoint a successor Agent at a Bondholders' Meeting convened by the retiring Agent or by way of Written Procedure initiated by the retiring Agent.
- (b) Subject to Clause 21.4(f), if the Agent is Insolvent, the Agent shall be deemed to resign as Agent and the Issuer shall within ten Business Days appoint a successor Agent which shall be an independent financial institution or other reputable company which regularly acts as agent under debt issuances.
- (c) A Bondholder (or Bondholders) representing at least 10 per cent. of the Adjusted Nominal Amount may, by notice to the Issuer (such notice may only be validly given by a Person who is a Bondholder on the Business Day immediately following the day on which the notice is received by the Issuer and shall, if given by several Bondholders, be given by them jointly), require that a Bondholders' Meeting is held for the purpose of dismissing the Agent and appointing a new Agent. The Issuer may, at a Bondholders' Meeting convened by it or by way of Written Procedure initiated by it, propose to the Bondholders that the Agent be dismissed and a new Agent be appointed.
- (d) If the Bondholders have not appointed a successor Agent within 90 days after (i) the earlier of the notice of resignation was given or the resignation otherwise took place or (ii) the Agent was dismissed through a decision by the Bondholders, the Issuer shall within 30 days thereafter appoint a successor Agent which shall be an independent financial institution or other reputable company with the necessary resources to act as agent in respect of Market Loans.
- (e) The retiring Agent shall, at its own cost, make available to the successor Agent such documents and records and provide such assistance as the successor Agent may reasonably request for the purposes of performing its functions as Agent under the Finance Documents.
- (f) The Agent's resignation or dismissal shall only take effect upon the appointment of a successor Agent and acceptance by such successor Agent of such appointment and the execution of all necessary documentation to effectively substitute the retiring Agent.
- (g) Upon the appointment of a successor, the retiring Agent shall be discharged from any further obligation in respect of the Finance Documents but shall remain entitled to the benefit of the Finance Documents and remain liable under the Finance Documents in respect of any action which it took or failed to take whilst acting as Agent. Its successor, the Issuer and each of the Bondholders shall have the same rights and obligations amongst themselves under the Finance Documents as they would have had if such successor had been the original Agent.
- (h) In the event that there is a change of the Agent in accordance with this Clause 21.4, the Issuer shall execute such documents and take such actions as the new Agent may reasonably require for the purpose of vesting in such new Agent the rights, powers and obligation of the Agent and releasing the retiring Agent from its further obligations under the Finance Documents. Unless the Issuer and the new Agent

agrees otherwise, the new Agent shall be entitled to the same fees and the same indemnities as the retiring Agent.

22 Appointment and replacement of the CSD

- (a) The Issuer has appointed the CSD to manage certain tasks under these Terms and Conditions and in accordance with the CSD Regulations and the other regulations applicable to the Bonds.
- (b) The CSD may be dismissed by the Issuer provided that the Issuer has effectively appointed a replacement CSD that accedes as CSD at the same time as the old CSD is dismissed and provided also that the replacement does not have a negative effect on any Bondholder. The replacing CSD must be authorized to professionally conduct clearing operations pursuant to the Central Securities Depository Regulation (Regulation (EU) No 909/2014) and be authorized as a central securities depository in accordance with the Financial Instruments Accounts Act.

If the Issuing Agent is Insolvent, the Issuer shall immediately appoint a new Issuing Agent, which shall replace the old Issuing Agent as issuing agent in accordance with these Terms and Conditions.
- (c) The Issuing Agent will not be liable to the Bondholders for damage or loss caused by any action taken or omitted by it under or in connection with any Finance Document, unless directly caused by its gross negligence or wilful misconduct. The Issuing Agent shall never be responsible for indirect or consequential loss.

24 No direct actions by Bondholders

- (b) Clause 24(a) shall not apply if the Agent has been instructed by the Bondholders in accordance with the Finance Documents to take certain actions but fails for any reason to take, or is unable to take (for any reason other than a failure by a Bondholder to provide documents in accordance with Clause 21.1(c)), such actions within a reasonable period of time and such failure or inability is continuing.

However, if the failure to take certain actions is caused by the non-payment by the Issuer of any fee or indemnity due to the Agent under the Finance Documents or by any reason described in Clause 21.2(l), such failure must continue for at least 40 Business Days after notice pursuant to Clause 21.2(n) before a Bondholder may take any action referred to in Clause 24(a).

- (c) The provisions of Clause 24(a) shall not in any way limit an individual Bondholder's right to claim and enforce payments which are due to it under Clause 9.6 (*Mandatory repurchase due to a Change of Control Event, a Listing Failure Event or a Delisting (put option)*) or other payments which are due by the Issuer to some but not all Bondholders.

The right to receive payment of interest (excluding any capitalised interest) shall be prescribed and become void three (3) years from the relevant due date for payment. The Issuer is entitled to any funds set aside for payments in respect of which the Bondholders' right to receive payment has been prescribed and has become void.
- (b) If a limitation period is duly interrupted in accordance with the Swedish Act on Limitations (*Sw. preskriptionslag (1981:130)*), a new limitation period of ten (10) years with respect to the right to receive repayment of the principal of the Bonds, and of three (3) years with respect to receive payment of interest (excluding capitalised interest) will commence, in both cases calculated from the date of interruption of the limitation period, as such date is determined pursuant to the provisions of the Swedish Act on Limitations.
